

Use iSee Video to:

- Monitor for intruders and help solve burglaries.
- Monitor nannies, babysitters and caregivers.
- Receive notifications when children get home and view video to see who might be with them.
- Monitor pets behavior.
- See who is at the door.
- Monitor house or pool cleaning services.
- Monitor second homes or vacation homes.
- Let friends and relatives look in on special occasions remotely

Alarm system integration

- Enables relatives to remain in their homes by monitoring medication, reduce household accidents due to forgetfulness, all with video verification.
- Added peace-of-mind with nannies and babysitters by receiving alerts for feedings, changings and naps, with video verification.
- Safe, gun or liquor cabinet monitoring.
- Integrates with most professional security systems
- Verify alarms with video of the event.

Ease-of-use

- Works with all internet ready cellphones, not just high end PDAs, and with any computer operating system so you can upgrade without worries.
- Passwords which only you control and know
- No dedicated phone or computer line needed, no computer needed on premises.
- Generous 50mb storage with more available as you need it.

A professional system installed by professionals

Self-installed kits rely on cheap sensors and cameras, are a frequent cause of false alarms and have poor quality video. With iSee Video you use the right camera for the application, and high quality sensors ensure reliability. The top selling wireless cameras on the market today are easily hacked, allowing others to look in on your home. With iSee Video, your video is secure, with security verified by VeriSign.

**View live video
on your tablet,
PC or cellphone &
know what's going on
in your home anytime,
from anywhere.**

iSeeVideo  **NAPCO**

Peace-of-mind delivered via cell phone or internet anywhere you are.

Now anyone can affordably look-in on their home and keep an eye on their property – anytime and anywhere there’s internet access – thanks to the revolutionary iSee Video PC home security camera system.

iSee Video let’s you see what’s happening at home right over the Internet. All you need with iSee Video is a PC or web-ready cell phone and you’re ready to view live video of your home at any time from any location (even on the household TV inside).

This reliable and economical system allows you to monitor video on just about anything you like. Use it to:

- See who’s at your door, or moving around your yard.
- Keep an eye on pets, nannies, babysitters or cleaning services.
- Verify that liquor or gun cabinets are secure.
- Check on the status of a second home or garage.
- And much, much more.

Cause for alarm?

In addition to viewing live video from your home security camera system, iSee Video will automatically e-mail video to you when there is an alarm. The clip records ten seconds before and after the alarm, so you can see what triggered it and determine whether it’s truly an emergency or only a false alarm. iSee Video’s security system integration can send you alerts whenever:

- Doors or windows are opened or broken
- Someone is moving around your home
- Leaks or temperature changes

You also can tell your home surveillance security system to alert you whenever a specific event takes place – such as your children returning home from school – and automatically send you the video update.

Latchkey kids: Just home or home alone? With iSee Video you’ll know via email!

Child care

Visually monitor your baby in its crib or room to add visual security to a traditional baby monitoring system. View live video on your TV, computer or cell phone from wherever you are.

Keep an eye on your children as they play outdoors. See what they are doing and who they are playing with.

Check in on the babysitter or nanny at will. With iSee Video you’ll know if your children are getting the care they deserve. Get notifications for specific events, view live-action video or review images later.
