

Customer related benefits

- Watch suspicious elements on your premises and gather evidence against shoplifting and burglary.
- Monitor customer traffic remotely – great to see the effectiveness of sales and to reduce labor costs.
- Visible cameras reduce crime before it happens.
- Employees and customers feel safer at night, walking through parking lots or working alone.
- Monitor critical dials, read-outs and gauges remotely.

Employee monitoring

- Presence of cameras discourage employee theft.
- Monitor live or recorded video of openings and closings.
- Keep track of loading dock deliveries and monitor stockrooms.
- Video evidence is kept off-premises and safe from employee tampering.
- Have video of workers' injuries to prevent others to be used as evidence.
- Check up on cleaning services.

Alarm system integration

- Verify alarms with video of the event.
- Confirm proper use of your lock box, drop box or safe.
- Store recorded video and/or receive email notifications when someone opens a sensitive door or cabinet, securing items like drugs or client and patient records.
- Video guard tours, live or scheduled. If the room is dark you can even turn on the lights.

Watch the savings mount

- Retrofits with any existing cameras.
- No dedicated phone or computer line needed.
- Generous 50mb storage with more available as you need it.
- Save time and travel expense retrieving and reviewing VHS surveillance tapes.

**View live video on
your PC or cellphone
and see what's going
on in your business
anytime, anywhere.**

Vista, XP, Mac OS, Unix, iPhone, Raxr and LG are trademarks of their respective companies.

An eye on your business delivered via cell phone or internet anywhere you are

To maximize the success of your business, you need to be on top of things at every moment. But how do you keep an eye on your business when you can't be everywhere at once?

Trust iSeeVideo. This revolutionary remote system lets you view live video of what's happening in your business – anytime, anywhere – so that you always have the peace of mind of knowing what's going on.

All you need is a PC or web-ready cell phone.

With iSeeVideo, all you need is your PC or a web-ready cell phone, to view live video over the Internet anytime you like. Don't have time to watch live? Archive your video and review it anytime.

Employee video surveillance is a must in any business with tight margins. Of course, it's good to monitor for shoplifting or break-ins but employee theft can mean a big drop in profits. Now with iSee Video you put a stop to minor problems before they affect your bottom line, because you can see for yourself what's happening in your operation when you're away. When you turn on your camera video surveillance, employees are more likely to give you their very best, and that can be good for everyone in your business.

Works with Vista, XP, Mac OS, Unix and Linux, as well as any internet capable cellphone, including iPhones, Razrs, LG and others.

Cause for alarm?

iSee Video integrated with your security system can minimize the effect of false alarms or catch an intruder in the act. Every time there's an alarm at any of your locations, you'll automatically receive an email with video of the event. This way you'll know immediately if it's a false alarm. Better yet, you just may have footage of the intruder who targeted your business if the alarm is real.

iSee Video integrates with nearly any security system, so you can even have video emailed to you of specific events such as openings and closings, shipments and deliveries, or anything else of importance to you. Know about sudden changes in temperatures – when the refrigeration system is down before you lose your perishable items. Know about power failures and water leaks even when nobody is there, so you have time to fix the problem before your doors open to customers.

Virtual guard tours: Have video of your premises emailed to you on a schedule, or simply look-in live whenever you like, day or night. With integration provided by your security system, you can even turn on the lights and check the lock status of your doors.

Video is time and date stamped, essential for use as evidence. Video security often reduces crime just by the presence of cameras, and customers and employees alike appreciate a safe environment.

A professional system installed by professionals

iSee Video is a system you can rely on. Video is time and date stamped, essential for use as evidence and to keep tabs on what happened and when. Self-installed systems rely on cheap sensors and cameras, which often fail, are a frequent cause of false alarms and have poor video quality. With iSee Video you can use any camera, so you have the right camera for the application, and high quality sensors ensure reliability. The top selling wireless cameras on the market today are easily hacked, resulting in privacy and security nightmares. With iSee Video, your video is secured, with security verified by VeriSign.
