

Relax – your home is secure ...

Our seasoned professionals are monitoring your system, to quickly summon help in any emergency. In addition, Freedom is rock solid – with all the advanced technology you need and want.

Talking touchpad. Comforting human voice talks you through system operation for ease-of-use. Adjustable volume too.

Chime feature sounds a tone whenever a specific door is opened – great for monitoring the pool gate, for example.

Pets? Freedom loves 'em.

Our system uses motion sensors so smart they can tell the difference between beloved Fido, Felix and intruders.

Smart, convenient technology. Freedom Touchpads with built in occupancy sensors and pet-friendly PIRs provide state of the art security and unique features: Such as auto-dimming the touchpad backlight when nobody is near and a built-in siren that momentarily softens in volume as you approach to reset.

Full coverage and room to grow –

Freedom is expandable up to 64 zones and supports all devices including smoke, carbon monoxide and motion detectors, video surveillance, glass break detection and panic buttons.

Designed to be easy to use – using the system can be done from our intuitive touchpad, a keyfob or even from a touchtone phone, anywhere in the world.

Freedom is a second pair of eyes focused on your home. With such a wide range of options, including integration with leading PC-based home automation software, your installation team can customize your system so that it works best for you. From a basic system, to a complete home automation networked home with lighting and climate control, your family's needs are our priority during system installation and for many years to come.

Technologically advanced and so easy to use, it's designed to be as stylish as you are

A keypad in your pocket. Turn your system on or off and get instant confirmation with a lock or unlock icon and more. Plus, out-and-about your home, you've got a personal panic to get you help in case of duress or medical emergency.

Smoke and carbon monoxide detectors can detect the slightest hint of fire and literally save the day (or night) for your family.

Smart motion detectors make up your interior security network, and can differentiate between a would-be burglar and your pets. Some contain temperature sensors to prevent damage in case of frozen pipes or broken HVAC, while you're gone.

Ask about these other options:

Code-free Freedom - no codes, intelligent security, false alarm free - just turn the key in the door and go; Two-way voice live emergency communication; Internet video surveillance at any PC or web-ready cell phone. One-button functions: silent alarm, bypass, night mode, police, fire and auxiliary panic

Know what's going on in your home, anytime, from anywhere

Watch live video of your home from PC or cellphone

iSeeVideo NAPCO

iSee Video let's you see what's happening at home right over the Internet. All you need with iSee Video is a PC or web-ready cell phone and you're ready to view live video of your home at any time from any location (even on the household TV inside).

iSee Video allows you to monitor video on just about anything you like.

- See who's at your door, or moving around your yard.
- Keep an eye on pets, nannies, babysitters or cleaning services.
- Verify that liquor or gun cabinets are secure.
- Check on the status of a second home or garage.
- And much, much more.

In addition to viewing live video, iSee Video will automatically e-mail video to you when there is an alarm. You also can tell your home surveillance security system to alert you whenever a specific event takes place – such as your children returning home from school – and automatically send you the video update. You can even store video for later review.

Works with any web enabled cell phone, including iPhones, PDAs, Razr, LG and others - no special software necessary. No limitations on PC operating systems either - works with Windows XP, Vista, Apple OS, Linux – on any standard web browser.
