

# Is your school security hanging by a wire?

## Avoid a failure to communicate...

## make sure your school gets help in an alarm or emergency

even if old phone lines are damaged or discontinued by the phone company

## Protect Your School or Campus from a Failure to Communicate in an Alarm or Emergency...

Traditionally, in an alarm or emergency, your alarm system detects it, and reports it via phone lines, to get you fast response from the proper authorities and/or your local school security force.

But did you know, every day more of those old expensive leased phone lines are being damaged, by storm or accident, and not replaced, but "retired", i.e., no longer repaired by the phone company jeopardizing response to your emergency response?

### **The Days of Old Phone Lines Are Numbered!**

- #1** As of Jan 2018, telephone companies are no longer required by the Government to maintain or keep POTS or PSTN lines working
- #2** In the event of a storm or accident, phone lines prone to damage, are no longer replaced
- #3** Old phone lines and networks are too expensive for phone companies to fix/maintain and are being retired or phased-out neighborhood by neighborhood, right now
- #4** Because the supply of POTS/PSTN landlines is low, costs are increasingly high

**...but now you have the ability to replace them with cellular &/or IP and save thousands of dollars each year, like many top schools & districts have already with StarLink**

*Each StarLink Fire®  
replaces two phone lines  
Alarm Panel for 2x*

## ...Add StarLink, Make Top Grade

**You Don't Need a New Alarm System, Just a New Way of C**

StarLink, a leader in universal wireless alarm communications, created glary or fire alarm system for the 21st Century and beyond, using today local school security and remote alarm reporting and emergency response. StarLink's been proven to save school systems like yours, thousands of POTs/PSTN lines, with proven wireless reporting, while meeting today

**Safeguard peace-of-mind, and get new remote smartphone control for your security office as a special bonus, too**

Using StarLink 's advanced cellular technology also enables us to provide with an App for new remote security system control via your smartphone. >> Check system status anytime, grant temporary access to get to auditorium or for deliveries, then remote arm the system afterwards, or case someone forgot.

## s for Security & Budget-Savings

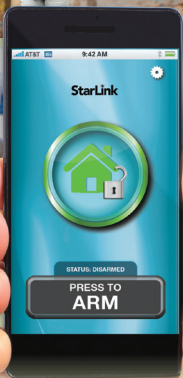

### Communicating

and a simple cost-effective add-on, that will upgrade your current burglar alarm system to the fastest and best cyberprotected digital cell and/or IP networks, for a one-time cost. On top of that, depending on the size of your district or campus, you can save thousands of dollars every year, replacing those undependable, vanishing old analog fire alarm lines with today's UL and NFPA Fire Codes.

### Convenience

Provide you with a mobile phone, too, so you can use it in the gym, at work, or even in the car.

## to Today's Top Wireless Communications

### Replacing Old Unreliable, Leased Phone Lines

Keep your people and property safe with round-the-clock professional monitoring and connect your system to virtually any security or fire alarm system, old or new, without the need for a leased phone line. Link Wireless Alarm Communicators connect your schools, buildings and homes to a professional monitoring station seamlessly. We use today's fastest multibillion dollar wireless networks and/or backup IP networks, instead of relying on old POTS lines that are slow or plain old gone.

Respond in any emergency, quickly and reliably.
