NAPCO INTERNET VIDEO

**Keep an eye on
business via cell
phone, email or
the Internet –
easily and
affordably.**

Peace-of-mind delivered via cell phone or internet anywhere you go.

Affordably keep an eye on the business, or multiple business locations, all, from any Internet PC or video cell phone. **What happens when the boss is away?** How are customers being served? **Or, how's the new store opening across town?** Are we busy?

Now, you can automatically be kept in touch via phone or email, or anytime there's an alarm or opening/closing report from your Napco Security System. Or, simply check in yourself, anytime, anywhere right over the internet. View events as they happen or archive video for later review.

Cause for alarm?

Your Napco security system can automatically send you video during an alarm by emailing your PC or your cell phone.

Video openings & closings:

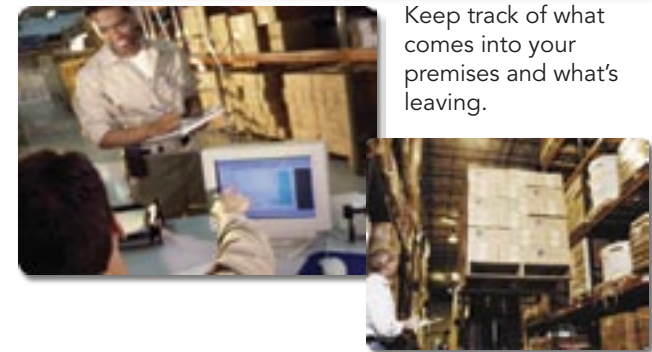

Check on the opening and closing of your premises, as well as keeping a time-stamped video log of each event; see who opened and who closed.

Multi-business locations:

Remote video monitoring allows you to keep in touch with multiple locations - in the business or across the globe.

Loading dock & deliveries

Keep track of what comes into your premises and what's leaving.

Choice of cameras

Use Napco VCAMI compact cameras
- or -
any brand, new or existing CCTV cameras
