

Protecting
your home
and loved
ones has
never
been
simpler

Introducing
Freedom—
high tech
security, just
lock up and go

No codes to remember ...

Nothing new to learn. Freedom is the first system that turns on and off automatically just by using your existing deadbolt lock, or even your automatic garage door.

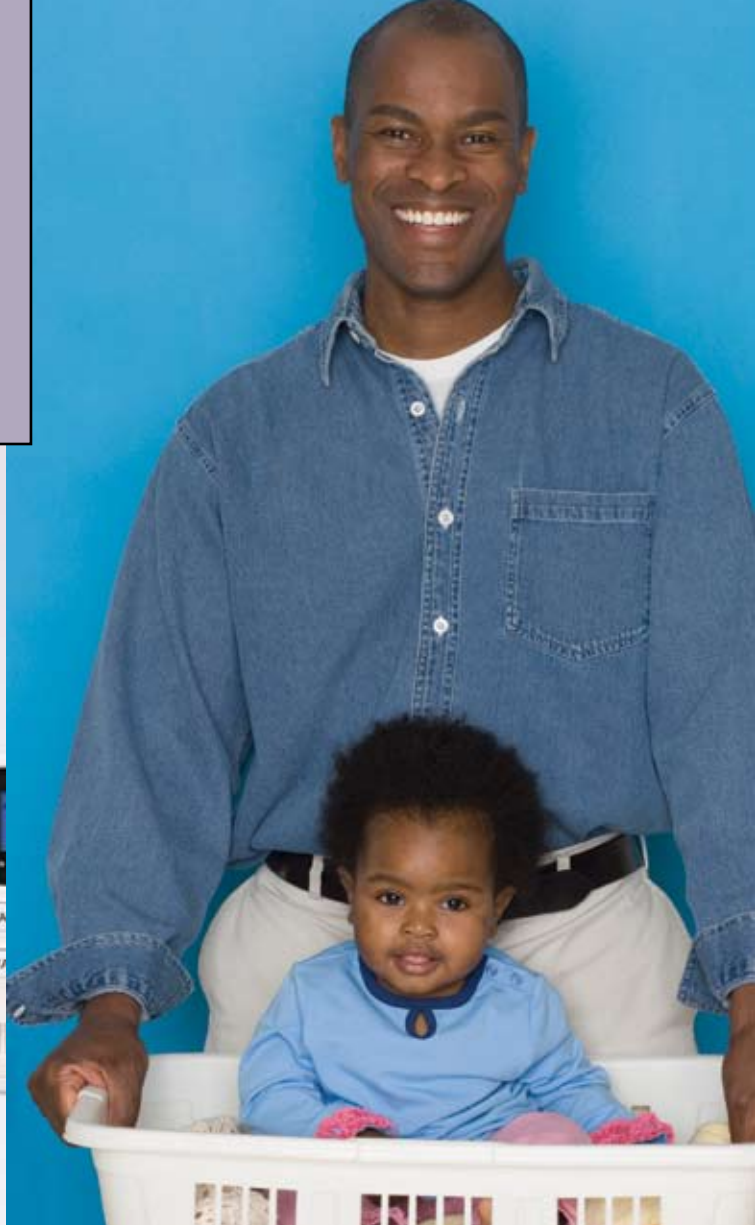

Come and go stress free ...

No system countdowns to meet, beat or worry about before your alarm goes off. Once you unlock the door, the system is off. Leave and lock the door and the the system's on.

No false alarm worries ...

Since Freedom is code-free, has no entry/exit countdowns and is pet-friendly, it's impossible to have false alarms during the times most false alarms happen.

Relax – your home is secure ...

Our seasoned professionals are monitoring your system, to quickly summon help in any emergency. In addition, Freedom is rock solid – with all the advanced technology you need and want.

Home security to fit the way you live ...

Don't give it a second thought – Freedom fits seamlessly into your lifestyle, so it's easy for every member of the family to use

Smart, convenient technology. Freedom Touchpads with built in occupancy sensors and pet-friendly PIRs provide state of the art security and unique features: Such as auto-dimming the touchpad backlight when nobody is near and a built-in siren that momentarily softens in volume as you approach to reset.

Back door? Sure, enjoy code-free control there, too.

Would you rather come and go through the garage? Freedom is so smart it can take its cue from your existing automatic garage door.

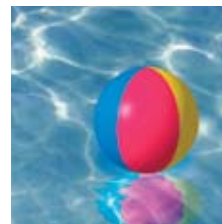

Freedom's optional Bedroom Touchpad lets you turn your system on and off and even conveniently shows whether your doors are locked. Three built-in panic button keys add extra peace-of-mind.

Lock and door monitoring – status is displayed on-screen and with built in voice whether the door is unlocked or ajar.

Chime feature sounds a tone whenever a specific door is opened – great for monitoring the pool gate, for example.

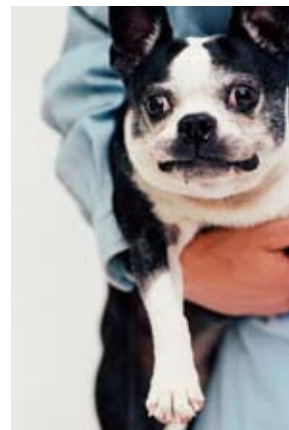

Pets? Freedom loves 'em.

Our system uses motion sensors so smart they can tell the difference between beloved Fido, Felix and intruders.

Kids coming home alone?

Automatically get an email at work or your cell phone when they get home

Technologically advanced
and designed to be as
stylish as you are

Coming home.

Unlock the door, the system turns itself off. Same system confirms it, saying "System disarmed," LCD reads the same.

Staying in.

Press 'STAY'. System says "Please lock door to arm in stay mode." LCD mirrors these steps.

Leaving.

Lock it and go! Freedom reminds you when you press AWAY, saying "Please exit & lock door to arm system". (A tone heard outside confirms it's on.)

Full coverage and room to grow – Freedom is expandable up to 64 zones and supports all devices including smoke, carbon monoxide and motion detectors, video surveillance, glass break detection and panic buttons.

Smart motion detectors make up your interior security network, and can differentiate between a would-be burglar and your pets. Some contain temperature sensors to prevent damage in case of frozen pipes or broken HVAC, while you're gone.

Smoke detectors can detect the slightest hint of fire and literally save the day (or night) for your family.

Ask about these other options:

Two-way voice live emergency communication; Internet video surveillance at any PC or web-ready cell phone. One-button functions: silent alarm, bypass, night mode, police, fire and auxiliary panic buttons.

 **Shopping around for a security system? If the competition lacks the features on this checklist, then come home to Freedom.**

- **Code-free and automatic** – nothing to memorize
- **No timed countdowns & adaptive occupancy sensor** enables system to turn on/off automatically, taking its cues from you – nothing to learn
- **Lock/door-ajar monitoring** – see status right on the touchpad's display, upstairs or down
- **False alarm proof guarantee** – (entering and exiting premises) - No fears, no fines, no embarrassment
- **System intelligence** – Auto-dimming and brightening backlight, pet-smart motion detector, siren with auto-squelch and spoken voice prompts to help you
- **Comprehensive coverage grows with you** (8 to 64 zones)
- **Reliability** – delivered by a singularly-focused security systems' designer and premier manufacturer with over 37 years proven security expertise and millions of systems worldwide.
